Piano Chords For Mary Did You Know

Piano Chords For Mary Did You Know

Downloaded from everybodystreet.com *by Hunter & Roberson*

INTRODUCTION

One of the most beloved modern Christmas carols, "Mary, Did You Know?" has captured the hearts of millions with its poignant lyrics and hauntingly beautiful melody. Whether you are a beginner pianist looking to play for a church service or an intermediate player wanting to add emotional depth to your performance, understanding the **piano chords for Mary Did You Know** is essential. This article provides a thorough breakdown of the chord progressions, voicing options, and performance tips that will help you master this piece on the piano. We will explore the song’s harmonic structure in the key of C major (the most common key for worship settings) and offer practical advice for players at every level.

OVERVIEW OF THE SONG

Written by Mark Lowry and Buddy Greene, "Mary, Did You Know?" poses a series of reflective questions to the mother of Jesus. The song is typically performed in a slow, worshipful tempo (around 70 BPM) and is set in a major key, giving it a sense of wonder and reverence. While many recordings use different keys—such as D-flat or B-flat—the **piano chords for Mary Did You Know** are most easily taught in the key of C major, which uses only natural chords and is accessible to beginners.

Before diving into the chords, it helps to understand the song's structure:

- **Verse 1 & 2:** 8 bars each, following a consistent pattern.
- **Chorus:** 8 bars, with a slight lift in dynamics.
- **Bridge:** 4 bars that modulate or add tension before the final chorus.
- **Tag (optional):** A repeated phrase at the end for emotional effect.

BASIC CHORDS IN THE KEY OF C MAJOR

The foundational **piano chords for Mary Did You Know** in the key of C major are:

- **C** (C – E – G) – Tonic
- **G** (G – B – D) – Dominant
- **Am** (A – C – E) – Relative minor
- **F** (F – A – C) – Subdominant
- **Dm** (D – F – A) – Supertonic (used

sparingly)
- **G7** (G – B – D – F) – Dominant seventh (for tension)

Occasionally, you may see an **Em** (E – G – B) in some arrangements. For a pure, simple version, stick with the five chords above. If you are playing for a congregation or accompanying a singer, these are all you need.

VERSE CHORD PROGRESSION

The verses follow a gentle, predictable pattern. Here is the chord progression for the first verse (8 bars), written in plain chord names:

1. C – G/B – Am – C/G
2. F – C/E – Dm – G
3. C – G/B – Am – Em/G
4. F – G – C – (hold)

Note: Slash chords like G/B mean play a G major chord but with B as the lowest note. This creates a smoother bass line. If you are a beginner, you can ignore the slash notes and simply play the chord in root position. However, learning these inversions will make your playing sound much more professional.

For example, instead of C (C-E-G) you can play C/G (C-E-G but with G in the left hand bass) or C/E (E in the bass). The essential **piano chords for Mary Did You Know** remain the same—only the bass note changes.

Verse 2 Variation

The second verse uses the identical progression, though some pianists add a passing chord such as a Gsus4 on the

last beat of bar 7 to create anticipation for the chorus. The sus4 chord (G – C – D) resolves back to G major.

CHORUS CHORD PROGRESSION

The chorus lifts the emotional energy. Here is the typical progression (8 bars):

1. F – G – Em – Am
2. F – G – C – (hold)
3. F – G – Em – Am
4. F – G – C – (hold)
5. F – G – Em – A7
6. Dm – G – C – C/B
7. Am – G – F – C/E
8. Dm – G – C – (hold)

The **A7** chord (A – C# – E – G) in bar 5 is a secondary dominant leading to Dm. This adds beautiful color. If you are a beginner, you can substitute A7 with A minor (Am) but you will lose some harmonic interest. The overall **piano chords for Mary Did You Know** in the chorus create a classic I–IV–V–vi pattern in much of the section.

BRIDGE SECTION

The bridge (often sung as "The blind will see, the deaf will hear...") is only four bars long. It typically modulates or uses chords from the relative minor to build intensity. One common arrangement in C major:

1. Bb – F/A – Bb – G/B
2. C – Dm – Gsus4 – G

The **Bb** chord (B♭ – D – F) introduces a flat seventh, which is borrowed from the C minor scale. This is a classic pop/rock move called a "flat VII" chord. For a

simpler version, you can skip the Bb and stay on F and C, but the emotional impact will be reduced. If you want to play the song faithfully, learning the Bb chord is highly recommended as part of the **piano chords for Mary Did You Know**.

LEFT HAND VOICINGS

While the right hand plays the chord shapes, the left hand can do much more than just play root notes. Use these techniques to make your performance fuller:

- **Single bass note:** Play the root of the chord (e.g., C for C major) on beat one, then rest.
- **Octaves:** Double the root an octave lower for a richer sound.
- **Broken octaves:** Alternate between root and fifth (e.g., C – G – C) to keep motion.
- **Arpeggiated patterns:** Roll the chord upward (e.g., C – E – G – C) to imitate a harp-like effect.

These left-hand patterns work with every chord in the song. As you practice **piano chords for Mary Did You Know**, try each pattern separately before combining them.

RIGHT HAND CHORD INVERSIONS

Chord inversions keep the melody smooth and avoid large jumps. For this song, the melody often outlines the chord tones. Here are recommended inversions for the verse chords in the key of C:

- **C major:** Root position (C-E-G) or first inversion (E-G-C)
- **G major:** First inversion (B-D-G) or second inversion (D-G-B)
- **A minor:** Root (A-C-E) or first inversion (C-E-A)
- **F major:** Second inversion (C-F-A) works well when coming from C

By using inversions, your right hand will stay close to middle C, making transitions easier. This is a key skill when learning **piano chords for Mary Did You Know** because the melody moves stepwise much of the time.

COMMON EMBELLISHMENTS

To add depth without changing the harmony, incorporate these simple embellishments:

- **Suspended chords:** Replace the third with a second or fourth. For example, Csus2 (C-D-G) or Gsus4 (G-C-D). Use them on long held notes.
- **Added 9th:** Play a Cmaj9 (C-E-G-D) or Fmaj9 (F-A-C-G). The 9th adds warmth.
- **Walking bass lines:** Use chromatic passing tones between chord roots. For instance, between C and Am, play G in the bass (C – G – A).
- **Syncopation:** Play chords on beats 2 and 4 instead of all four beats to create a gentle swing feel.

These techniques are especially effective in the chorus and bridge. Many professional recordings of **piano chords**

for Mary Did You Know use at least one of these embellishments throughout.

TIPS FOR BEGINNERS

If you are just starting out, follow these steps to master the **piano chords for Mary Did You Know**:

1. Learn each chord in root position first. Practice switching between C, G, Am, F, and Dm until you can do it without looking.
2. Play the verse using only block chords (both hands together) at a slow tempo. Count out loud.
3. Once comfortable, use the left hand for single bass notes and the right hand for chords. Keep it simple.
4. Add the melody (if you are playing alone) by playing the top note of each chord with your right hand thumb or pinky.
5. Gradually increase speed to the original tempo (around 70 BPM). Use a metronome.

Focus on one section per practice session. Many learners find the verse easiest and the bridge most challenging due to the Bb chord. Be patient.

TIPS FOR INTERMEDIATE PLAYERS

If you already know the basic chords, you can elevate your performance with these strategies:

- **Arpeggiate the left hand** in a broken pattern (e.g., root, fifth, octave, third) throughout the

verse.

- **Use chord substitutions:** Replace the Dm with Dm7 (D-F-A-C) or the G with G7 (G-B-D-F) for a bluesy touch.
- **Add passing chords:** Between F and G, insert an F#dim7 (F#-A-C-Eb) for a chromatic walk.
- **Change the key:** Try transposing the **piano chords for Mary Did You Know** into D major or Eb major to match a singer's range. This will deepen your understanding of harmony.
- **Play the melody with your right hand** while using closed voicing chords in the left hand (e.g., root and third in the left, melody in right).

PERFORMANCE AND WORSHIP CONTEXT

This song is frequently performed in churches during Advent and Christmas. A few practical considerations:

- **Pace:** Let the chords ring; do not chop them short. Use the sustain pedal sparingly to avoid muddiness.
- **Dynamic arc:** Verses are soft (piano), chorus is louder (mezzo-forte), bridge can build to forte, then drop back for the final verse.
